DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Woodland Survey District is located on the Old Legislative Road north of its intersection with Klondike Road in the center of the Georges Creek Coal region of Western Maryland. Most buildings within the survey district are located on both sides of Old Legislative Road and Main Street, which intersect at the northern end of the district.

The architecture of the town is characterized by vernacular styled frame dwellings. Most are 2 story, 3 bay by 1 bay dwellings based on the ell or tee plan. These buildings rest on stone foundations and have gabled roofs. Examples are #20 and #27 on the attached map. Building #27, a rectangular building with a gable front roof, has a decoratively bracketed shed roofed porch sheltering its facade.

One building within the survey district is a 1½ story, 3 bay by 2 bay square structure. It rests on a stone foundation and has a crossed gable roof. The building is #28 on the attached map.

A row of duplex "block" houses at the eastern end of Main Street are 2½ story, 4 bay by 4 bay, rectangular frame structures. These buildings rest on low stone foundations and have gabled roofs. Hip roofed porches shelter their facades. An example is #26 on the attached map. (AL-VI-B-032)

The Woodland Methodist Episcopal Church (AL-VI-B-163) is a 1 story, 1 bay by 3 bay frame building based on a rectangular meeting house plan. It rests on a stone foundation and has a gabled roof. The church is #9 on the attached map.

STATEMENT OF SIGNIFICANCE

Woodland is a typical company town located in the center of the Georges Creek coal region of western Maryland. The town was established by the Consolidation Coal Company in 1897.¹ At that time the company was expanding its operations in the Georges Creek region by opening the new #7 mine near the #17 mine, approximately one mile southwest of Woodland.²

The earliest portion of the town, a row of Ce building lots on Main Street, was laid out in 1897.³ In 1898 an addition to the town was laid out by the company.⁴ The "Coal Trade Journal" reported in 1897 that 42 houses were standing in the company's new town.⁵

The houses built in Woodland were rented to miners employed by the company for four dollars a month.⁶ It was also possible for a miner to lease his home from his employers for a 5 year term.⁷ Although most of the buildings erected in Woodland were single family units a row of 5 duplex "block" houses was put up at the eastern end of Main Street.⁸
